🔧 Bolder Services | React Native App Development

1. Project Overview

Project Name: bolder. services
Stakeholder: Omar Adel

Reviewer: Raheem Amer
Developer(s): Sara Mustafa

Figma Design Link: [[Figma Design]](#)

Purpose:
To develop a **responsive, mobile-first React Native application** using **Expo**, based entirely on the approved Figma design, optimized for performance, animations, and cross-platform delivery.
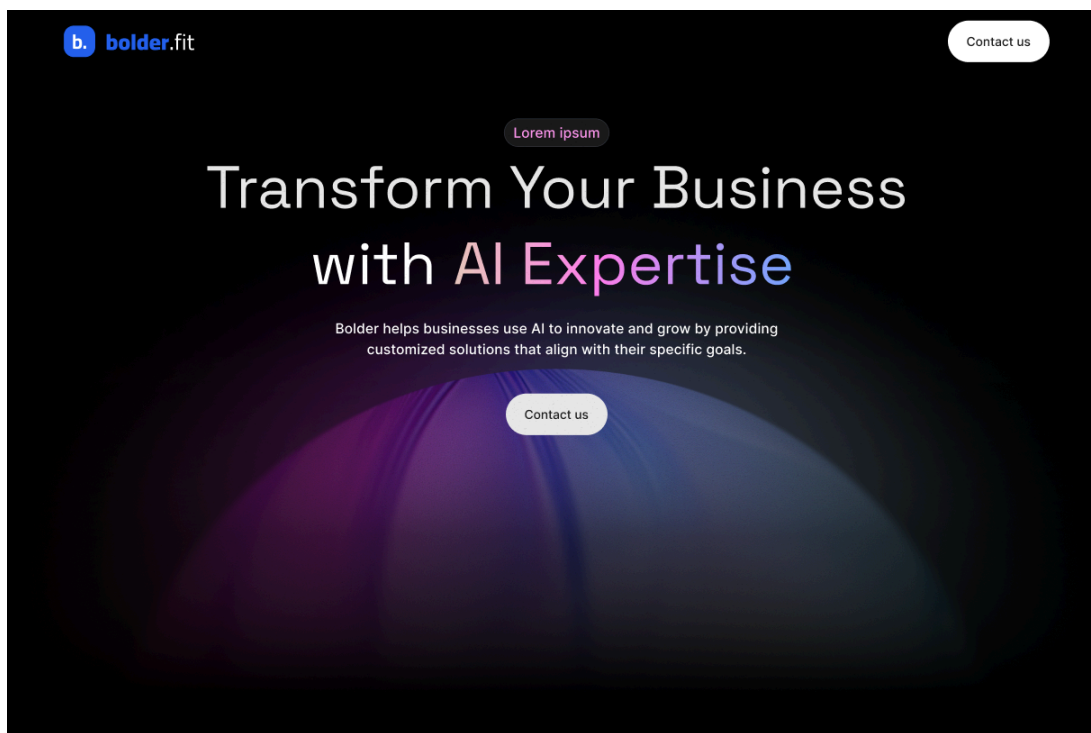

2. Scope of Work

- Convert Figma design into a pixel-perfect React Native app
- Implement all design-defined animations/interactions using appropriate animation libraries
- Ensure seamless responsiveness and layout adaptation across Android and iOS devices

3. Technical Requirements

Requirement	Details
Framework	React Native (via Expo)
Styling	Tailwind-compatible utility-first styling via [NativeWind](#) or preferred method
Deployment Target	iOS & Android (via Expo Go or builds)
Form Handling	Local state + internal API or 3rd-party (e.g. Formspree, EmailJS, etc.)

Analytics	Developer's choice (Expo Analytics, Amplitude, Firebase, etc.)
SEO	N/A (since it's a mobile app)
Performance Goals	Initial app load < 3s; app interaction smoothness
Accessibility	WCAG 2.1 AA basic compliance (React Native Accessible props)
Version Control	Git - Github

---

4. Responsive & Platform Behavior

Ensure the app works well on:

- iPhone SE (2nd gen), 8, X, 11, 12, 13, 14

- Android Devices (Samsung S10+, Pixel 4–7 series)

- Tablet view: iPad vertical/horizontal layout

Test using:

- Expo Go

- Physical devices or emulators (iOS & Android)

---

5. Figma Development Notes

Animations:

Each section should match the design's animation intent:

- **Consultation:** Glow effect on hover/tap

- **Solutions:** Animated pills movement

- **Needs:** Puzzle pieces animated into position

Suggested libraries:

- `react-native-reanimated`

- `react-native-animatable`

- `moti` (if using NativeWind)

Fonts & Assets:

- **Fonts:** Space Grotesk, Inter (via `expo-font`)

- **Assets:** Download from [Google Drive Link]

---

6. Integration Requirements

No third-party integrations required at this stage. Leave open to developer recommendations.

7. Deliverables

- Fully functional mobile app reflecting Figma design

- Codebase with clean, well-commented structure

- README.md with setup instructions

- APK (Android) or TestFlight (iOS) test build

- Responsive layout across standard mobile/tablet resolutions

- Animations and interactivity as defined in design

8. Timeline

Milestone	Due Date
Development Start	10/07/2025
Development End and shipping the project for review	15/07/2025

9. QA & Testing Requirements

- Cross-device testing (iOS + Android)

- App launch speed/performance (using Expo Performance tools or Flipper)

- Animation smoothness

- Accessibility: Labels, Roles, Tab navigation

- Lighthouse N/A (web tool), but performance to be benchmarked via native tools
